POSITION TO BE FILLED

Founded in 1998 and located in Quebec City, CorActive is a company that specializes in the manufacture of optical fibers. We are a rapidly young, dynamic and growing team; we offer professional development opportunities, a group insurance program and performance bonus, a competitive salary and more. We are currently looking for:

**TECHNOLOGIST, OPTICAL FIBER LASERS
OR
JUNIOR ENGINEER, OPTICAL FIBER LASERS**

Principal Function:

As a member of R&D and under the direction of VP of R&D, you will participate in the development activities of optical fiber lasers; you will also have to supervise the lasers assembly and work done by a technician. You will have to perform tests and measurements affecting the durability of fiber lasers, as well as preventive and equipment maintenance. Under the supervision of the responsible engineer, you will take an active part in the design, improvement of the products, implementation of the manufacturing procedures and acquisition, installation and adjustment of equipment. You will have to carry out your work in a laboratory and often in a cleanroom.

REQUIRED PROFILE:

- DEC in technology physics with a minimum of 3 years' experience or Bachelor's degree in physics or physics engineering or electrical engineering with no other experience;
- Strong analytical skills, synthesis and memorization;
- Innovative, resourceful, independent;
- Ability to work with precision and dexterity;
- Ability to comply with rigorous and methodical procedures;
- Oriented in team action and results;
- Reliable, involved and willing to excel;
- Intermediate computer skills;
- Ability to communicate in French and English would be an asset

TO APPLY:
